

Object : Work placements for students (from France)

Dear Sir, Dear Madam

Our catering and hospitality School, which is based in Normandy in France, has a long tradition of working in partnership with hotels and restaurants in the Brighton area, in Gatwick and Heathrow area for the working placements of our students.

We value the mobility of our students because it allows them to discover other practices, other cultures and it strengthens their language skills in professional situations.

We are extremely happy with these work placements because they give our students an additional asset in the progress of their training and our aim is to develop our network of hotels and restaurants in the south west of England.

All the students selected for our work placements abroad have acquired some practical experience through compulsory training periods in French restaurants and have practiced English language through practical and professional activities.

The basis of the work placements are the following :

- Our school fully insures all our students with an international policy covering all damages the student might cause or suffer during the working period.
- A partnership agreement (please find documents used with our partners) has to be signed between the school and the establishment and the students.
- The teachers in charge of the work placements will accompany the students to England and to France, and will remain on duty by email and by telephone during the work placement.
- All these work placements are unpaid (excepting the long-term placement), trainees must be provided with accommodation, meals and laundry.

You will find the details in the partnerships agreements, the dates in the summary paper, and a copy of the agreement

We hope we will have the opportunity to work with you, please feel free to contact the following persons if you need more information and are interested by our work placement program.

Best Regards

Mme JAMELIN
